Outstanding Metrics Portal Contributor

Murali has advanced the Metrics Portal greatly, delivering tangible results through both his feature development and automation testing rigor. In little more than a year, he has gone from a beginning contributor to owning several sections of the Portal including revised SLA reports, a more robust test framework and a brand new Security section that has received glowing reviews from the InfoSec team. Furthermore, he does all of this while separated geographically from the main Metrics team.

Murali is disciplined, self-motivated, and results-oriented and this award is much deserved. Thank you Murali for all that you do to deliver a top-quality Metrics Portal to our customers!

Marc Thompson

Manager, Software Development
